

IV Group Collection of Steel Cans

5. What is the Conditions of Practice of Site Collection?

- The recycling route in a private sector except the group collection, there are site collection/store collection. Recently, some stores are collecting recycling make voluntary efforts, and there are more cases that the municipalities are participated in. The report of the conditions is as follows:

Store collection box installed in the supermarket.

The Conditions of Practice of Site Collection (multiple answers)

The site collection that the municipalities are participating such as in installation or collection (left chart below) are collected at municipalities facilities or public facilities such as community center recording 45.5% which is almost half. When the private sector voluntary collect (right chart below), highest ratio is collecting at the stores recording 40.7% but it was found that the collecting companies practicing collection recording 6.1%.

[Municipalities Participated Type]

	FY2009	
	Wards and cities	rate (%)
Installed at public facilities or school etc.	323	45.5
Collaborate with stores to install.	166	23.4
Other	69	9.7
Not participated	243	34.2
Unknown	61	8.6
Total	710	100.0

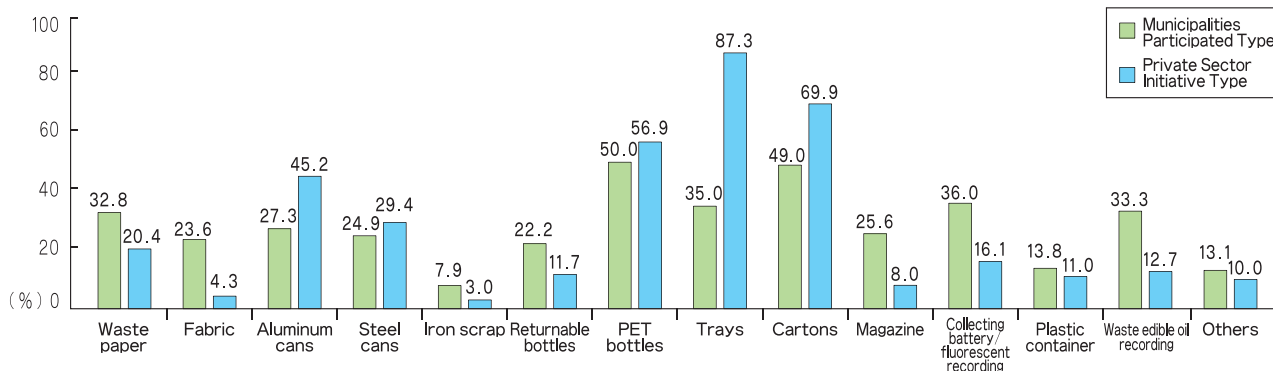

[Private Sector Initiative Type] e.g., Site collection at supermarkets

	FY2009	
	Wards and cities	rate (%)
Practiced by Stores	289	40.7
Practiced by recycling collecting companies	43	6.1
Not known	412	58.0
Total	710	100.0

Note. The date of Private Sector Initiative Type is limited to the numbers that the municipalities found.

The Items Collected (multiple answers)

It might be because the Municipalities Participated Type is aimed for collecting toxic wastes by providing opportunities to the residents, the ratio of collecting battery/fluorescent recording (36.0%) or waste edible oil recording 33.3%. On the other side, Private Sector Initiative Type indicates that collecting items that they are dealing with or recycling that can be valuable resource. The ratio of collecting trays is high recording 87.3% among the Private Sector Initiative Type which was originally started by them.

The Regional Rate of Practicing Site Collection of Municipalities Participated Type (multiple answers)

They tend to practice at public facilities or schools rather than cooperating with stores over all. Especially the ratio collecting at public facilities are higher in Hokkaido region and Chugoku region. On contrary, there are more municipalities in Tohoku region and Shikoku region.

	Public facilities or schools		Cooperating with stores		Others		Not participated	
	Wards and cities	rate (%)	Wards and cities	rate (%)	Wards and cities	rate (%)	Wards and cities	rate (%)
Hokkaido (34)	20	58.8	6	17.6	4	11.8	10	29.4
Tohoku (70)	21	30.0	11	15.7	6	8.6	36	51.4
Kanto (175)	98	56.0	54	30.9	9	5.1	48	27.4
Hokuriku (45)	20	44.4	15	33.3	5	11.1	15	33.3
Chubu (119)	57	47.9	30	25.2	21	17.6	27	22.7
Kinki (85)	41	48.2	24	28.2	9	10.6	28	32.9
Chugoku (43)	25	58.1	6	14.0	0	0.0	14	32.6
Shikoku (32)	8	25.0	4	12.5	2	6.3	18	56.3
Kyushu/Okinawa (107)	33	30.8	16	15.0	13	12.1	47	43.9

Note. Inside () indicates the number of municipalities in each district, and the ratio shows the percentage of municipalities performing each measure.
